

E.

Maryland has a statewide erosion and sediment control program that requires erosion and sediment control plans for all construction activity that disturbs greater than five thousand square feet of earth or 100 cubic yards of earth movement. Maryland regulations contain procedures for approving proposed construction drawings and erosion sediment control plans prior to the start of construction. TU relies on this qualifying local program to comply with this control measure.

Maryland requires that stormwater management for new development and redevelopment be addressed for any proposed project that disturbs five-thousand square feet or more of earth. MDE is responsible for reviewing, approving, and enforcing Stormwater Management Plans for State and federal construction projects. MDE considers compliance with the State statute to satisfy this minimum control measure.

Implement and maintain pollution prevention and good housekeeping techniques to reduce pollutants from all TU operations. This minimum copollction. TU relies on thtor Statoos
